

ANDROID VIDEO CALLING HAS ARRIVED

BUILT RIGHT INTO ANDROID.
SEAMLESS USER EXPERIENCE.
NO 3RD PARTY APP TO LAUNCH

WITH SEAMLESS HANDOVER
FROM GSM - CDMA - WIFI WITH
VIDEO

The Android Video Calling Solution from Hughes Systique Corp. & ARRIS is integrated deep into Android's Telephony Framework to offer you never before Video Calling Features:

KEY FEATURES

Seamless handover between GSM, CDMA and Wifi calls with or without Video without call drop

Vastly superior performance compared to 3rd party video calling applications

Video calling is a part of the Android Telephony Framework which means all apps automatically get the benefit of Video calling and Fixed mobile convergence with no code change!
