

Enterprise Digital Transformation – No Longer an Option!

Role Of Machine Learning In Accelerating Digital Transformation

Machines can now learn to speak, write and interpret meanings in videos and images. Intelligent machines will help support humans as we enter the age of the intelligent enterprise. This progress in machine learning means endless acceleration in digital transformation. Businesses can now extend and optimize their processes. Business leaders would have the opportunity to gain a powerful ability to devise customer interaction patterns as well as operations so they can obtain profound insights.

How Connected Manufacturing Will Save Time

Manufacturers and enterprises face a constant pressure to continuously improve their services and operational performance.

The traditional manufacturing systems sadly were not designed to analyze or interpret tons of data but the Internet of Things can change the way how manufacturing systems work. Simply put, the IoT platform gives enterprises a chance to achieve operational excellence. Yes, it now comes down to reaching operational innovation and excellence with connected 'smart devices'.

Overcoming Online Video Streaming Challenges with Better QoE

The limitless combinations of device, network, content, and places suggest that the stream reaching you at a given point may be navigating through uncharted territory.

This means that the QoE of your online video stream depends on a number of factors. To overcome challenges in the OTT environment, offering an outstanding quality of experience (QoE) is crucial. Viewers desire the same level of quality for online streaming as they get with the conventional cable or satellite services.

Implementing Social Data Analytics For Maximizing Profits In Hospitality Industry

Social data analytics helps Hoteliers to get a clear understanding of segment behavior, needs, and expectations. It helps them identify profitable customer segments and their buying preferences. Right Positioning for these segments helps to encourage repeated visits, increase sales during their stay by up-selling profitable services like fine dining, exotic wines & cocktails, gyms, spa services, golf, theatre, local site trips etc.
